Related Words: Architecture, Design, Urbanism, Technology, Environment, Sustainability, Planning

Location: Rio de Janeiro, Brazil

Program Length: Variable

Language Level: No requirement

Relevant Area of Study: Architecture (GSD)

Short Paragraph:

Organization Mission Statement: +D is an antidisciplinary studio that conducts research, design and development [R&D2] integrating architecture, public policy and technology to create public value, intergenerational legacies and systemic change. We are based in the favela of Vidigal, Rio de Janeiro which serves as our urban laboratory for developing innovative, scalable and sustainable solutions to problems facing our cities, especially in the Majority World [Latin America, Africa and Asia]. We design with purpose to deliver concrete results that bridge the pursuits of social function, aesthetic excellence and technological innovation. For more information: www.plusDstudio.com

Student Intern Activities: As a +D Summer Intern in Architecture, you will join our antidisciplinary team in the delivery of projects that integrate architecture/urbanism with policy and technology. Projects will vary in size, scope and phase of design (from conceptual design to construction) and require the application of a range of physical and digital design skills (including Rhino, V-Ray, Adobe Creative Suite, etc.) and fieldwork. You will also contribute to the planning and execution of a series of events/installations concurrent with the Rio2016 Summer Olympic Games. The ideal candidate will demonstrate exceptional creativity, curiosity, ingenuity and leadership capacity along with strong writing, conceptual thinking and communication skills.
